

We are MiP Pharma

- a medium-sized pharmaceutical company based in Saarland in the heart of Europe, founded in 1970,
- with own facilities for production of parenterals, "Made in Germany"
- and broad experience as a manufacturer for sterile filling of liquids and freeze-dried products - fast, reliable and flexible.

Let's work together!

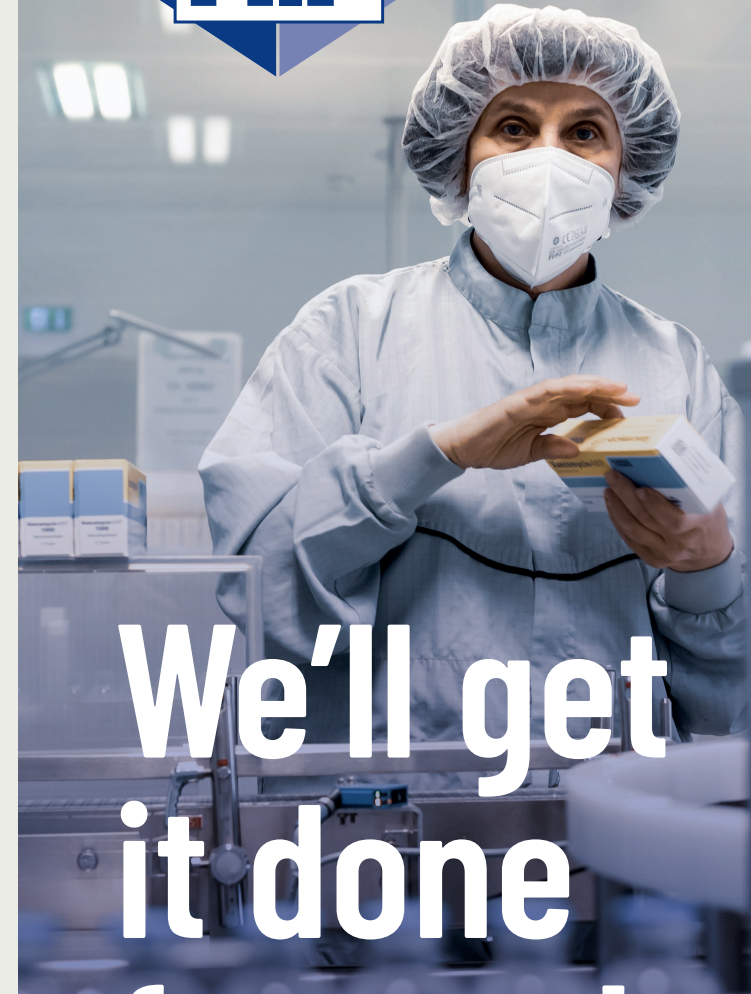

Just get in touch with us to discuss your project.
We look forward to hear from you.

We'll get it done for you!

CMO Services and Ready-to-use
Production Spaces "Made in Germany"

Are you looking for ...

... a reliable, experienced pharmaceutical contract manufacturer?

or

... a ready-to-use "brown field" including qualified staff for your project?

Great!
You've found your perfect business partner.

Our CMO services for you

Sterile filling of liquids and freeze-dried products

Our modern manufacturing site at Homburg was built 2012 and is EU-GMP certified since 2013. Current focus is aseptic manufacturing of liquid and freeze-dried (lyophilized) products. With a highly skilled team and a proven track record in aseptic manufacturing, we offer significant, readily available capacity in aseptic manufacturing including freeze drying, QC-Lab services, batch-release as well as warehousing & logistics.

Pharmaceutical production modules for fast capacity expansion

Our manufacturing site holds six independent production units. Three of them are flexibly available as "client project modules" (CPMs) from 100 m² up to 1000 m², including all prerequisites to establish the environment for manufacturing of sterile products within shortest possible timelines.

There is no easier and faster way to establish and expand pharmaceutical production capacities. You have the project - we have the fully equipped space and the knowhow readily available.

How can we support your business?
